KANCHI RAJPUT

Los Angeles, California | 213-414-9521| kanchira@usc.edu | kanchirajput26.github.io/portfolio | linkedin.com/in/kanchirajput/

SUMMARY

Engineering Management graduate with hands-on experience leading Agile project delivery, workflow automation, and AI-enabled product development. Skilled at translating ambiguous requirements into structured roadmaps and shipped products.

SKILLS

- **Automation & Data Analytics:** SQL, Python, JavaScript, Power BI, Tableau, Google Analytics, Data Visualization & Dashboarding, KPI Tracking & Reporting, Demand Forecasting, Supply & Demand Planning, Process Optimization, Google Apps Script
- **Process & Project Management:** Agile, Scrum, Critical Path Management, Milestone & Schedule Planning, Risk Management & Mitigation, Resource Allocation, Cross-Functional Coordination, Stakeholder Management, WBS, Gantt Charts, Budget Tracking, NPV Analysis, Change Management (ADKAR)
- **Tools & Platforms:** Jira, Trello, MS Project, Lucidchart, Visio, Figma, Canva, Slack, Zendesk, Microsoft Office Suite, AWS, Azure, GCP

EXPERIENCE

EducationPals.ai **Santa Clara, CA (Remote)**

Product Positioning & Go-to-Market | Product Marketing Manager Intern (Excel, Google Workspace, Claude) **Sep 2026 - Present**

- Own positioning, messaging and value propositions for an AI-native learning platform and its course catalog, working directly with the CEO to align product narrative with company vision and target learner needs.
- Research the competitive landscape, audience segments and category trends in AI-driven education, synthesizing findings into actionable insights that inform go-to-market planning for new course and feature launches.
- Create marketing content and launch materials, including landing page copy, email campaigns and social posts.
- Track channel and campaign performance to identify what resonates with learners, using insights to strengthen future launch strategies.

Robot Components Private Limited **Faridabad, India**

Flowchart Management System and Checklists | MIS Intern (Excel, Google Workspace, Javascript) **June 2025 - July 2025**

- Analyzed internal workflows across 5+ business functions to identify process bottlenecks, improving visibility into task ownership and execution timelines.
- Designed and implemented automated workflow tracking systems using Google Apps Script, reducing manual status updates by ~30% and improving real-time visibility into task progress and team coordination.
- Implemented alert-based escalation and automated checklists for delayed tasks, dispatch, and procurement, improving accountability, turnaround time, and operational efficiency.
- Generated and analyzed MIS reports to track employee KPIs for 15+ employees on a weekly and monthly basis, enabling data-driven decision-making for management.
- Explored AI tools to support rapid prototyping and improve efficiency in process optimization tasks by ~25%.

PROJECTS

Smart Scheduling Agent| Next.js, React, Framer Motion **June 2026 - July 2026**

- Built a task management app that sorts tasks into four priority (Do First, Schedule, Delegate, Eliminate) based on urgency and importance, with an override option to manually pin a task to a quadrant.
- Added three ways to view tasks - Quadrant board, Timeline (grouped by Today/This week), and Calendar, plus an Overview dashboard showing active, overdue, completed task counts and a quadrant distribution breakdown.
- Included subtasks with progress tracking (e.g. 0/3 complete) on individual tasks

University of Southern California **Los Angeles, USA**

USC Housing Mobile App - OCM & Planning | ISE 515 - Engineering Project Management (MS Project) **October 2025 - December 2025**

- Led project planning and scheduling for a large-scale mobile application initiative, developing a structured 7-phase roadmap spanning 22+ months across initiation, development, testing, and deployment.
- Built resource allocation models by translating generic roles into industry-aligned positions (Associate PM, UX/UI Designer, Full-Stack Developer, DevOps, QA, and Support).
- Developed a comprehensive Organizational Change Management (OCM) strategy using the ADKAR framework, focusing on student adoption, stakeholder engagement, and long-term behavioral change

EDUCATION

University of Southern California, Viterbi School of Engineering **Los Angeles, US**

Master of Science in Engineering Management | GPA - 3.57/4.00 **August 2025 - December 2026**

Shiv Nadar Institute of Eminence **Uttar Pradesh, India**

Bachelor of Technology in Electronics Engineering - Major | GPA - 3.40/4.00 **August 2020 - May 2024**

Bachelor of Management - Minor

EXTRA CURRICULAR ACTIVITIES

University of Southern California **Los Angeles, California**

Teaching Assistant | ISE 515: Engineering Project Management **January 2026 - Present**

- Assist with grading assignments and exams and conduct office hours to support a cohort of 32 students with course concepts.
